PENGEMBANGAN APLIKASI MOBILE

PERTEMUAN 15

Project Sprint 5: Final Preparation

Demo Prep, Presentation, Build & Release

Program Studi Teknik Informatika
Institut Teknologi Sumatera
Tahun Akademik Genap 2025/2026

FINAL SPRINT - DEMO NEXT WEEK!

W11	Sprint 1: Planning	✓
W12	Sprint 2: Core Features	✓
W13	Sprint 3: Advanced Features	✓
W14	Sprint 4: Polish & Testing	✓
W15	Sprint 5: Final Preparation	◀ NOW
W16	UAS: DEMO DAY!	🎉

⚡ This is it! Final touches before the big day!

OUTLINE PERTEMUAN

01

Sprint 4 Review

Final check

02

Demo Preparation

Flow, script, backup plan

03

Presentation Guide

Structure dan tips

04

Build & Release

Signed APK, versioning

05

UAS Requirements

Penilaian dan format

06

Practice Session

Dry run demo

BAGIAN 1

DEMO PREPARATION

Flow, Script, dan Backup Plan

DEMO FLOW (10-15 MENIT)

1 min	Introduction App name, team, problem solved
2 min	Overview Main features, tech stack highlights
6-8 min	Live Demo Show all features, key user flows
2 min	Technical Deep Dive Architecture, interesting challenges
2-3 min	Q&A Answer panel questions

WRITE YOUR DEMO SCRIPT

```
## Demo Script Template

### 1. Introduction (1 min)
"Hi, we are Team [Name]. We built [AppName], an app that helps users [problem]."
```

2. The Problem

"Many people struggle with [problem]. Our app solves this by [solution]."

3. Live Demo

- Open app, show home screen
- "First, let me show you how to [core feature 1]..."
- Demonstrate feature 1
- "Next, you can [core feature 2]..."
- Demonstrate feature 2
- Show error handling (intentionally trigger offline mode)
- Show search/filter functionality

4. Technical Highlights

"Under the hood, we use:"

- KMP for cross-platform
- Clean Architecture
- [Interesting technical decision]

5. Closing

"That's [AppName]. Questions?"

DEMO DO's AND DON'Ts

✓ DO:

- Practice multiple times
- Use realistic test data
- Explain as you click
- Show enthusiasm!
- Have backup (screenshots/video)
- Test on demo device beforehand
- Prepare for common questions

✗ DON'T:

- Read from notes word-by-word
- Rush through features
- Ignore errors (acknowledge them)
- Use test123 dummy data
- Say "this doesn't work but..."
- Go over time
- Leave app in broken state

 **Pro Tip: Record yourself practicing. Watch it back. Cringe. Improve. Repeat.**

The best demos look effortless because they're well-rehearsed!

BACKUP PLAN - WHEN THINGS GO WRONG

App crashes

→ Have APK ready to reinstall, use backup device, show video recording

No internet

→ Test offline mode, have hotspot ready, prepare offline demo path

Device won't connect to projector

→ Bring adapter, test beforehand, use screen recording

Feature doesn't work

→ Acknowledge, explain what should happen, show code/architecture instead

Forgot what to say

→ Have notes on phone, practice transitions, breathe and continue

BAGIAN 2

PRESENTATION GUIDE

Structure dan Tips

PRESENTATION SLIDES STRUCTURE

1	Title Slide	App name, team name, members
2	Problem Statement	What problem does it solve?
3	Solution Overview	How your app solves it
4	Features	Key features with screenshots
5	Demo	Live demo section
6	Architecture	Tech stack, architecture diagram
7	Challenges & Learnings	What was hard? What did you learn?
8	Future Plans	What's next if you continue?
9	Q&A	Thank you, questions?

INCLUDE ARCHITECTURE DIAGRAM

Tools: Excalidraw.com, draw.io, Mermaid, atau bahkan PowerPoint shapes!

BAGIAN 3

BUILD AND RELEASE

Signed APK dan Versioning

BUILD RELEASE APK

```
# 1. Generate Keystore (one time)
keytool -genkey -v -keystore my-release-key.jks -keyalg RSA \
-keysize 2048 -validity 10000 -alias my-key-alias

# 2. Configure signing in build.gradle.kts
android {
    signingConfigs {
        create("release") {
            storeFile = file("my-release-key.jks")
            storePassword = "password"
            keyAlias = "my-key-alias"
            keyPassword = "password"
        }
    }
    buildTypes {
        release {
            signingConfig = signingConfigs.getByName("release")
            isMinifyEnabled = true
        }
    }
}

# 3. Build release APK
./gradlew assembleRelease

# Output: composeApp/build/outputs/apk/release/composeApp-release.apk
```

 **NEVER** commit keystore password to git! Use local.properties atau environment variables.

VERSION YOUR APP

```
// build.gradle.kts
android {
    defaultConfig {
        versionCode = 1          // Increment for each release
        versionName = "1.0.0"    // Semantic versioning
    }
}

// Show version in app
Text("Version ${BuildConfig.VERSION_NAME}")
```

Semantic Versioning: MAJOR.MINOR.PATCH

- MAJOR: Breaking changes, major rewrites
- MINOR: New features, backward compatible
- PATCH: Bug fixes, small improvements

Example: 1.0.0 → 1.0.1 (bug fix) → 1.1.0 (new feature) → 2.0.0 (redesign)

BAGIAN 4

UAS REQUIREMENTS

Penilaian dan Format Demo Day

UAS DEMO DAY FORMAT

July
17

Format Demo Day:

- Waktu: 10-15 menit per tim
- Format: Presentasi + Live Demo + Q&A
- Audience: Dosen penguji + mahasiswa sekelas
- Device: Bawa device sendiri (Android phone/emulator)

Yang Harus Disiapkan:

- ☐ Presentation slides (PDF/PPTX)
- ☐ Working app on device
- ☐ Backup video recording of demo
- ☐ GitHub repo (cleaned up, good README)
- ☐ Release APK file
- ☐ Architecture diagram

UAS GRADING RUBRIC (35%)

Komponen	Bobot	Kriteria
App Functionality	30%	All features work, no crashes, good UX
Code Quality	20%	Clean code, proper architecture, tests
Demo & Presentation	25%	Clear explanation, smooth demo, confident
Technical Depth	15%	Good architecture decisions, problem solving
Q&A Response	10%	Answer questions correctly, understand code
★ Bonus: iOS demo (+5%), Exceptional polish (+5%), Play Store ready (+5%)		

COMMON Q&A QUESTIONS

Prepare answers for these:

? Why did you choose this architecture?

? How do you handle offline mode?

? What was the most challenging part?

? How would you scale this app?

? Why KMP instead of native or Flutter?

? How do you handle errors?

? What would you do differently?

? How did you divide work in the team?

BAGIAN 5

SPRINT 5

DELIVERABLES

Final Checklist

DELIVERABLES SPRINT 5

Bobot: 5% | Deadline: Sebelum UAS (Pertemuan 16)

Deliverables:

- ☐ All bugs fixed, app is stable
- ☐ Presentation slides ready (PDF/PPTX)
- ☐ Demo script written and practiced
- ☐ Release APK built and tested
- ☐ README finalized (features, setup, screenshots)
- ☐ Video backup of demo (just in case)
- ☐ Team practiced demo at least 2x

 **Submission: GitHub repo + Slides + APK uploaded to e-learning**

FINALIZE YOUR README

```
# 📱 AppName

[Screenshot or GIF here]

## 👥 Team
- Member 1 - @github - Role
- Member 2 - @github - Role

## 📄 Description
Brief description of the app.

## ✨ Features
- Feature 1
- Feature 2
- Feature 3

## 🛠️ Tech Stack
KMP, Compose, Ktor, SQLDelight, Koin

## 🏗️ Architecture
[Architecture diagram or description]

## 🚀 Getting Started
1. Clone repo
2. Open in Android Studio
3. Run on device/emulator

## 📦 Download
[Link to APK or Play Store]

## 🖼️ Screenshots
[More screenshots]
```

BAGIAN 6

PRACTICE SESSION

Dry Run Demo

TODAY'S WORK SESSION

1

15 min

Final bug fixes - fix any remaining issues

2

20 min

Prepare presentation slides (at least outline)

3

15 min

Write demo script - what to show, in what order

4

10 min

Practice demo once (dry run)

End of Today:

- App is demo-ready (no blocking bugs)
- Slides outline complete
- Each team member knows their part
- Practiced at least once

FINAL WEEK TIMELINE

This Week (Before UAS):

- Today: Final fixes, slides outline, first practice
- Tomorrow: Complete slides, write demo script
- Day 3: Build release APK, update README
- Day 4: Full practice run (time yourself!)
- Day 5: Polish, backup video, final check
- Day 6: Rest, light review, prepare mentally
- **UAS Day: Demo Day!** 🎉

SESI TANYA JAWAB

FINAL CHECKLIST

- ☐ App works without crashes
- ☐ All features demonstrated
- ☐ Presentation slides ready
- ☐ Demo script written
- ☐ Release APK built
- ☐ README finalized
- ☐ Practiced demo 2+ times
- ☐ Backup video recorded

1 WEEK TO GO!

Week 16: UAS DEMO DAY 🎉

*"The expert in anything was once a beginner."
- Helen Hayes*

You've come so far. Finish strong! 💪

You've Got This!

Sprint 5: Final Preparation

*"Success is where preparation
and opportunity meet."*

- Bobby Unser

See you at Demo Day! 

Terima Kasih

Good luck on Demo Day! 🍀

NEXT WEEK:

UAS DEMO DAY!

Bring your A-game! 🦾
